

## RANS S-9 Aerobatic Aircraft

**\$20,499.00**

Features: Ready to fly, finished in 2008. Currently registered. "Low back" with rear window. Perhaps one of the best looking S-9s you will ever see or fly. Handles like a dream, flies with two fingers on the stick!! . . . No bad tendencies. **This aircraft, with me flying, is presently being featured in many television commercials on prime channels all over the US!**

- Fresh annual in Dec 2018, less than 187 hours TT.
- All manuals, No outstanding ADS. Newer RANS heavy duty wing struts, Aileron spades for faster roll rates.
- Azusa wheels and brakes.
- Heavy duty main gear legs, tires and tubes, like new.
- Extra new tailwheel (original still good)
- BRS 800 soft pack mounted behind seat with activating handle in front of pilot.
- Beautiful "Low back" version with full canopy and rear window (see photo)
- Canopy fitted with quick-release pins to allow easy deployment of BRS system.
- Finished with beautiful Stewarts covering process
- 582 Rotax, "Blue head" electric start with dual (nonpumper) carbs and using premix oiling.
- Rotax 2.58 "B" box
- Warp drive 2 blade prop, smooth as glass!
- Dual Rans wing tanks, (new style) with individual petcocks for fuel management. 8 gallons each for 16 gallon total. Average fuel burn approx. 2.5 gal per hour, premix.
- Center mount aux gas tank for inverted flight, or additional storage with separate petcocks.
- Custom inverted flight capable fuel tank caps with autovents (no spills when inverted)
- Dual electric fuel pumps + stock Rotax fuel pump.
- Wiring chart, all wires numbered and labeled showing all connections
- Falcon ASI 0-140mph
- ACS G meter
- Altimeter
- Grand rapids EIS w/ EGTS,CHTS, Water Temp, OAT and voltmeter
- Circuit breakers, master switch
- Hour meter
- Icom A6 radio with antenna, pushbutton mike key on control stick.
- RAM camera mount on top aft section of canopy for great in flight videos for your GoPro or Virb action cameras

**Total cost, not including labor = \$28,600.59**

**Asking \$20,499.00, OBO Based, and being sold in, Cameron Park Ca, (061) zip 95682**

This aircraft can be quickly (within about 1 to 1&1/2 hrs) disassembled for shipping in a trailer or crate and then quickly reassembled at buyers home base. (buyer's responsibility). Note: there are folks who tear their S9 down, go to airshows, reassemble, do the show, disassemble and trailer home!
