Complete set of boxes containing small parts

Remarks:

I bought the kit in 1999 but never had a chance to build it. It's now time to sell.

In 2004 the basic kit configured for an IO-240 engine listed for \$25,000. The optional equipment I bought cost \$2,743. Taking inflation into account, the kit is a great value at \$19,900.
